 - Revise drafts at the inter sentential, intrasentential and discourse levels.

CULTURAL AWARENESS OBJECTIVES

* Work with authentic materials to become familiar with typical behaviors in common everyday situations

- Determine appropriate protocol relative to various extra linguistic behaviors related to:

Distance
Touching
Eye contact
Gestures
Time
Etiquette
Seating
Gifts
Honoring guests
Tipping
Other.

- Produce culturally appropriate linguistic utterances relative to:

Greetings
Excusing self
Taking leave
Asking/Giving directions
Showing respect
Well-wishing
Polite inquiry
Giving/Receiving compliment
Accepting/Declining
Making excuses
Complaining
Other.

*** Understand culturally significant meaning associated with language.**

- Produce semantic networks of associations.
- Explain underlying cultural connotations of words.
- Group vocabulary in culture-related clusters.

*** Become empathetic toward target culture(s).**

- Identify and interpret behaviors that are different from one's own.
- Brainstorm, discuss, and/or role-play students' preconceived ideas, impressions, and different experiences.
- Base judgments on objective considerations, not on biases.
- Choose plausible explanations of critical incidents.

*** Analyze situations and tolerate ambiguity.**

- Question and/or assess one's sources of information.
- Brainstorm, identify and examine one's stereotypes.
- Resolve conflicts through simulations.
- Prepare and /or dramatize culture capsules and culture clusters.
- Avoid over generalizations.
- Write culture assimilations.

THINKING SKILLS OBJECTIVES

* **Monitor and evaluate own use of language.**

- Assess own comprehension of written and oral discourse.
- State how well a certain task and/or learning activity has been achieved.
- Avoid prescriptive reading and listening.

* **Explore and conceptualize topics/issues under consideration.**

- Summarize, classify, compare, contrast, and assess linguistic input.
- Relate new input to existing world knowledge.
- Transfer previous knowledge to new situations.
- Deduce and/or infer.
- Produce mental and/or auditory images/representations of new information.

* **Develop confidence as life-long learners.**

- Ask questions and elicit clarifications from teachers and peers.
- Participate in group work to solve problems and/or check performance.
- Give and receive feedback.
- Use mental and physical techniques to reduce anxiety and increase competence.

STUDY SKILLS OBJECTIVES

* **Develop organizational skills.**

- Keep and maintain an assignment folder and/or agenda.
- Restate course objectives.

* **Develop textbook skills.**

- Identify the various parts of the book.
- Derive meaning from illustrations.

* **Develop library and research skills.**

- Visit libraries and utilize data bases.
- Locate relevant information.
- Consult dictionaries, encyclopedias, journals, and/or books.
- Take and make notes.

* **Use a variety of study strategies.**

- Preview-survey written discourse.
- Skim the text for main idea(s) the gist, and/or overall comprehension.
- Scan the text for specific information, key words/concepts, and linguistic markers.
- Organize ideas for oral and/or written communication.

CYCLE I OF BASIC EDUCATION FOR CURRICULAR OBJECTIVES

Grades 1, 2, & 3

By the end of Cycle I, students are expected to be able to

LISTENING OBJECTIVES

- * **Develop basic factual and inferential comprehension of what is heard.**
 - Respond to a series of oral instructions.
 - Answer questions about something heard.
 - Recall information previously heard.
 - Identify key elements in a story.
 - Take messages.
- Comprehend and interpret what is heard.**
 - Paraphrase events in a story.
 - Predict outcomes based on previous knowledge.
 - State similarities and differences between main characters, feelings, or actions.
 - Sequence the events of a story.
 - Fill out missing words or phrases in a song or short paragraph.
 - Match dictated words to printed words.
 - Distinguish different types of sentences heard.

ORAL COMMUNICATION OBJECTIVES

- * **Impart and seek factual information.**
 - Ask and answer questions related to different types of information.
 - Give information about oneself, others, and things from environment.
 - Tell or retell a story.
 - Discuss printed or visual material.
 - Receive and relay messages.
- * **Develop transactional skills.**
 - Offer and accept invitations and assistance.
 - Give reasons for making choices.
 - Give clear instructions to someone to perform a certain task.
 - Express proper socio-linguistic mannerism (apologize, forgive...).
 - Predict events, consequences, or effects.
 - Express opinion and give advice.
 - Give solutions to problems.
- * **Express and find out basic feelings and emotional states.**
 - Express mood, feelings, likes, and dislikes.
 - Express preference, needs, wants, desires.
 - Express empathy with others.
- * **Use appropriate socio-linguistic rules.**
 - Negotiate solutions to problems, misunderstandings, and disputes.
 - Address and greet people appropriately.
 - Introduce people appropriately.
 - Initiate and close discussion spontaneously or when instructed.
 - Paraphrase and recap ideas for peers.
 - Use non-verbal cues to solve communication problems.

* **Participate effectively in a range of group speech activities.**

- Report to class on a story, personal experience, TV program.
- Interact with others in problem-solving activity.
- Participate in simple role-playing.

READING OBJECTIVES

* **Develop basic factual comprehension of what is read.**

- Answer appropriate questions.
- Draw or make graphic entries to record information.
- Sequence events in chronological order.
- Identify main idea and supporting details in a text.

* **Develop basic comprehension of appropriate literature.**

- Identify literary genre.
- Identify key elements of the story; e.g., physique and personality of the character, character traits, different parts of the story, plot, setting, climax, outcome, problem-solution.
- Explain characters' feelings and motives at different points of the story.
- Distinguish between different characters, motives, literary genre, plots, settings, etc.
- Express personal feelings about different characters, stories, and plots.
- Retell a story in your own words.

* **Demonstrate the ability to use textual and experienced-based clues to get meaning.**

- Use context clues to infer meanings of vocabulary words and idioms.
- Underline common homophones, homographs, compound words, multi-meaning words, suffixes, and prefixes in a given text.
- Circle text-binding threads, such as proper nouns/pronouns, subjects/verbs.
- Provide synonyms, antonyms, and simple definitions for underlined words in a text.
- Group words into lexical sets.
- Make simple part-whole analogies.

- * **Make inferences from what is read.**
 - Make plausible predictions about future events, such as a character's future actions or the end of the story.
 - Suggest titles for a given text.
 - Speculate on the author's purpose.
 - Infer reasons for a character's actions.

- * **Develop decoding skills.**
 - Distinguish between short and long vowel sounds by filling in missing sounds in known words.
 - Underline letter blends in sets of given words.
 - Add some common prefixes and suffixes to familiar base words.

- * **Develop oral/silent reading skills.**
 - Practice echo and choral reading: poems, songs, jingles, and text.
 - Read signs, labels, menus, sign posts, bulletin boards, and other notices.
 - Create sentences with onomatopoeic words.

- * **Interpret what is read.**
 - Explain why characters feel a certain way at different points in a story.
 - Conjecture what would happen in a story 'if ...'.
 - Explain what one would do if one were in a similar situation as the main character.
 - Interpret a story completely in one's own words.

- * **Read for pleasure.**
 - Go spontaneously to a reading corner or library and select a story to read.
 - Recommend stories to and exchange books with classmates.
 - Orally present/write a short book report.

* **Develop reading strategies.**

- Preview, predict, set purpose.
- Adjust reading rate to purpose.
- Complete timed reading assignments.

WRITTEN COMMUNICATION OBJECTIVES

* **Develop greater control and fluency by writing legibly in printed and cursive style.**

- Write capital and lower case letters and numbers in manuscript and in cursive style.
- Write in a straight line across the page.
- Leave the right amount of space between letters and words in both manuscript and cursive writing.
- Label items and illustrations.
- Record data on a chart/graph or graphic organizer.

* **Develop competence in several basic print conventions.**

- Use capitals to begin sentences and write proper nouns.
- Indent the first line of a paragraph.
- Use end marks appropriately (period, comma, question mark and exclamation mark).
- Write the date correctly.

* **Spell regularly used words which observe common patterns.**

- Identify words that contain a particular sound in a given passage.
- Sort words which contain three different sounds into three groups and generalize a rule.
- Use clusters already learned to form as many new words as possible.
- Practice using common letter strings in crossword puzzles and other word games.
- Spell and write down words that have long and short vowel sounds.
- Spell words with the following endings: '-ing', '-ed', '-s', '-est', '-es'.
- Correct own spelling mistakes.

* **Develop and expand writing skills through guided and semi-guided activities.**

- Write simple and complex sentences.
- Unscramble a text and write first, second, and last in the right place.
- Generate topic and concluding sentences for incomplete paragraphs.
- Join sentences with and, but, however, though and or.
- Communicate using different genres of writing.

* **Develop process writing skills.**

- Brainstorm ideas.
- Select and narrow topics.
- Watch a film or video; conduct an interview; consult reference books to generate ideas for a topic.
- Use graphic organizers (clusters, webs, story maps, time lines) to arrange ideas.
- Choose appropriate supporting details.
- Identify audience: self, peers, others.
- Identify purpose of writing.
- Identify tone of message.
- Write individual or group first draft using best-guessed spelling.
- Interpret simple proofreading marks.
- Detect errors by reading aloud.
- Use a dictionary to check spelling.
- Complete unfinished sentences/ideas.
- Rearrange, add, and delete words, phrases, sentences, redundancies, irrelevancies.
- Clarify confusing or wordy sentences.
- Indicate any other mechanical errors.
- Write a final copy.
- Publish the final copy on a wall magazine, a newsletter, school magazine or bulletin board.
- Share in making a Big Book.
- Share own writing through oral reading.

THINKING SKILLS OBJECTIVES

* Develop a repertoire of metacognitive strategies to solve language processing problems.

- Preview discourse.
- Set a specific goal; e.g., complete reading exercise in 10 minutes.
- Apply strategies to commit material to memory: margin notes, summarize in own head, form mental images, rehearse aloud, underline or highlight important information.
- Self-evaluate: recognize one's strengths and weaknesses, and need for peer and adult assistance.
- Reflect on the learning which has taken place: assess what has been mastered, what remains unclear.

* Develop information processing skills: literal and critical.

- Relate language experiences to life experiences.
- Compare and contrast.
- Classify information.
- State the main idea.
- Identify irrelevant information.

* Develop confidence as life-long learners.

- Request assistance and clarification from peers, adults, and parents.
- Consult reference sources to expand own knowledge.
- Give and receive feedback.
- Use mental and physical techniques to reduce anxieties.

STUDY SKILLS

- * **Develop organizational skills.**
 - Adhere to rules and instructions.
 - Organize study materials and study time.
 - Listen to others' conversations.
 - Write legibly for future reference.
 - Conduct self-evaluation.
- * **Develop textbook skills.**
 - Recognize parts of texts.
 - Use key pages (table of content, glossary, etc.) for easy reference.
- * **Develop library and research skills.**
 - Alphabetize listings.
 - Use library search facilities.
 - Make use of library selections.
 - Consult reference texts.
 - Familiarize self with array of references available.
 - Identify features of reference texts.
- * **Develop appropriate strategies.**
 - Reflect on and evaluate learning.
 - Listen to others' conversations.
 - Collaborate with teachers and peers for learning.
 - Organize strategy for study.
 - Do note-taking.
- * **Develop reading rate.**
 - Practice speed reading exercises.
 - Encourage extra-curricular reading.
 - Use effective strategies to decode.

CULTURAL AWARENESS OBJECTIVES

* **Recognize and understand typical behaviors in common everyday situations.**

- Determine appropriate protocol relative to various extra-linguistic behaviors.
- Produce culturally appropriate linguistic utterances.

* **Use authentic materials to familiarize oneself with the target culture.**

- Match common national objects and artifacts to corresponding countries.
- Use realia to compare and contrast the Lebanese and target cultures.
- Set up classroom display centers which feature dolls, stamps, currency, pictures, postcards, etc. from the target culture.

* **Become empathetic toward the target culture.**

- Prepare a performance of songs, jigs, and dances which typify the target culture.
- Read about a typical day in the life of a 6 to 8-year old target culture child; list the things s/he does alone, and compare these things to what the learner does alone; state the things the learner believes he could do alone, if given the chance.
- Give examples of proverbs which are the same in Arabic and the target language.
- Generate and ask a target culture guest speaker/visitor simple questions about his/her family, country, job, interests, pets, daily habits.

CURRICULUM OBJECTIVES FOR GRADE THREE OF BASIC EDUCATION

By the end of Grade 3, students are expected to be able to:

The curriculum designed for both general and natural science secondary classes resembles the adjunct model of content-based instruction. The goal of such a program is to focus on academic competence in addition to language communication skills.

The umbrella theme for the two-year program is science. The sub-themes are related to each other and are recycled throughout the learning period. Most of the selections are to be derived from EFL texts, content textbooks, journals, magazines, newspapers, as well as audio-visual materials. It is our belief that such materials reflect authentic language, engages students' interest, exploit all language areas, and are readily available.

The following are samples of the suggested themes :

THEMES FOR THE SECOND SECONDARY: SCIENCES

CURRICULAR OBJECTIVES FOR THIRD SECONDARY YEAR - SOCIAL SCIENCES & ECONOMICS

By the end of Third Secondary, the students in the Social Sciences and Economics Section are expected to be able to do the following:

LISTENING OBJECTIVES

*** Demonstrate basic understanding of academic lectures.**

- Summarise lectures.
- Take notes.
- Make relevant comments.
- Identify speaker, context, and audience.
- Identify main ideas.

*** Demonstrate critical understanding of spoken discourse.**

- Reorganize presented ideas in different formats (e.g. writing, dialogue, etc.).
- Reinterpret presented ideas using researched information.
- Point out gaps in lecture.
- Identify speaker's purpose, role, and tone.

*** Demonstrate awareness of linguistic and organizational structure of text.**

- Recognize dialectal variation (mainly British and American) and foreign accents.
- Identify features of style and register.
- Identify key terms stressed in text.
- Identify transitionals.
- Identify methods of development of ideas.

ORAL COMMUNICATION OBJECTIVES

* **Demonstrate advanced oral skills in responding to oral or written input.**

- Identify original ideas.
- List issues discussed.
- Identify and list logical sequence markers.
- Identify and rectify fallacies.
- Identify strengths and weaknesses of presentation.
- Summarize main ideas fluently and accurately.
- React to other's views in critical discussion.

* **Show advanced command of oral presentations of researched topics.**

- Develop main ideas fully maintaining unity of theme.
- Maintain audience interest by asking questions, varying intonation, and using graphic illustrations.
- Support presentations with a variety of data (statistics, facts, audio-visual aids etc.)
- Make timed presentations on pre-assigned topics.

* **Participate in problem solving activities.**

- Participate in and lead debates.
- Interrupt, ask, comment, agree/disagree.
- Ask for repetition and clarification.

* **Demonstrate practical knowledge of the rules of spoken discourse.**

- Observe turn-taking rules.
- Join conversations at appropriate transition points.
- Keep interruptions brief.
- Speak coherently and clearly with proper enunciation and intonation.

READING OBJECTIVES

- * **Demonstrate understanding of specialized texts (History, Geography, Economics).**
 - Recognize, identify, and define related concepts and terminology.
 - Identify main ideas and details.
 - Recognize and identify irrelevant information and false generalizations.
 - Identify and explain implied meanings and attitudes.
 - Identify and explain bias, false analogies, faulty deductions, incomplete statistics, and insignificant differences.
- * **Demonstrate improved reading strategies.**
 - Scan to locate specific information.
 - Skim for gist or main idea.
 - Vary rate according to purpose and material.
- * **Read and analyse texts to identify and explain organizational patterns.**
 - Identify thesis statement, topic sentence, supporting details, and conclusion.
 - Identify elements of cohesion in a text (opening and closing statements, key terms, transitionals, parallelism, and the like).
 - Identify different writing styles and explain how they change according to topic, writer, and context.
- * **Demonstrate ability to cope with assigned readings in specialized publications.**
 - Make summaries and abstracts.
 - Make notes for research.
 - Evaluate references.
- * **Identify and manipulate technical jargon.**
 - Use appropriate terminology and structures in oral/written responses.
 - Identify and explain stylistic features of read materials.

WRITTEN COMMUNICATION OBJECTIVES

* **Demonstrate advanced writing skills in responding to input.**

- Organize notes taken in a logical fashion.
- Make adequate summaries and abstracts.
- Comment on or critique what is heard or read.

* **Demonstrate ability to reinterpret texts.**

- Reorganize ideas in tables, graphs, charts, etc.
- Rephrase assigned sections.
- Vary style to suit changing purpose, situation, and audience.
- Modify parts of the text to change orientation, tone, or style.

* **Show advanced skills in writing well-researched papers.**

- Prepare research projects.
- Use wide variety of resources and references.
- Follow proper documentation procedures.
- Use different expository and argumentative methods of development.
- Draft, re-draft, and proof-read.
- Maintain thematic unity.
- Write coherently employing logical sequencing, transitionals, and repetition of key terms.

* **Demonstrate ability to write for different interactive purposes.**

- Write business letters.
- Respond to advertisements.
- Initiate campaigns and projects.
- Fill in application forms.

THINKING SKILLS OBJECTIVES

- * **Develop awareness of interaction between fields.**
 - Relate information across fields.
 - Apply techniques learned in one field in another.
 - Relate changes in one field to changes in other fields to demonstrate interdependence of fields of study.
 - * **Demonstrate critical interpretation and appreciation of written and spoken discourse.**
 - Take notes consistently and coherently.
 - Predict outcomes of events.
 - Make valid evaluations, judgements, and inferences.
 - Present critique of texts and of others' work.
 - * **Show the ability to evaluate different theories and strategies in fields of study.**
 - Explain a theory.
 - Discuss the applicability of a theory to a specific context.
 - Compare between one theory and another.
-
- ## **CULTURAL AWARENESS OBJECTIVES**
- * **Demonstrate appreciation of the similarities and differences among various political and economic systems discussed in texts.**
 - Identify operating principles of each system.
 - Compare principles and practices in the various systems.
 - Identify some cultural considerations that may account for variations among systems.
 - * **Develop understanding of and commitment to global issues presented in written texts.**
 - Identify, analyse, and discuss issues of global nature (peace, the environment, etc.).
 - Research reactions of various cultures to global ecological issues (pollution, acid rain, the ozone layer, etc.).
 - Identify principles and functions of global organizations (cultural tolerance, cross-cultural interaction, multiculturalism, etc.).
 - Present comments on the role of international organizations in preserving the cultural heritage of a nation.

*** Develop empathy/tolerance towards other cultures and systems.**

- Recognize stereotypes.
- Identify and interpret behaviors that are different from one's own.
- Adopt behavioral patterns of target culture that you like.

STUDY SKILLS OBJECTIVES

*** Follow academic and professional lectures and panels.**

- Take notes.
- Outline issues presented for further discussion and research.

*** Demonstrate ability to synthesize information from different subject-matter areas.**

- Make an independent and discriminating selection from a wide range of reference material.
- Identify and use specialized encyclopedias and dictionaries.
- Use a range of information from a variety of media (guides, manuals, indexes, official documents, electronically stored information, documentaries, etc.).

*** Demonstrate ability to use advanced research techniques.**

- Demonstrate ability to use library facilities.
- Prepare detailed questionnaires adequate for research papers.
- Prepare and carry out interviews for research purposes.
- Present research papers following acknowledged style sheets and formats.

CONTENT AREAS

- * History
- * Geography
- * Sociology
- * Economics

THEMATIC UNITS

- Current local and global issues in social sciences and economics
- Interdisciplinary issues (Historical events and geographical changes and their influence on the economy)
- The media (promotion and information)
- Historical personages
- Historical highlights
- Archaeological sites
- Democracy
- Human rights
- Waves of emigration
- World organizations
- Post-war societies and national re-construction plans
- The ecological environment
- Pollution (Air, water, soil, noise, visual)
- Natural phenomena, wonders, and disasters
- Urban, sub-urban, and rural issues
- Natural resources and reserves
- The family
- Youth problems and interests
- Sports
- Gender issues
- Economic organizations and systems
- International economic relations
- Developed, developing, and under-developed countries
- Industrial revolutions and recessions
- Socio-economic issues (labor, employment, production/consumption, inflation, living standards, life-expectancy, etc.)

CURRICULAR OBJECTIVES FOR THIRD SECONDARY YEAR: GENERAL SCIENCES

By the end of Third Secondary, the students are expected to do the following:

LISTENING OBJECTIVES

* **Understand specific details and information from various scientific sources.**

- Identify objectivity markers in scientific discourse.
- Recognize specific details as examples of general science topics
- Understand lectures using scientific graphic conventions.

* **Sustain comprehension in extended scientific discourse.**

- Summarize arguments.
- Outline salient points
- Paraphrase parts of information.

* **Demonstrate awareness of the special language used in scientific discourse.**

- Identify stylistic features.
- Identify special linguistic structures and explain how they deviate from normal discourse.
- Identify the special terms used in the text.

ORAL COMMUNICATION OBJECTIVES

* Understand and produce discourse using more advanced notions of science.

- Deliver cause/effect presentations.
- Clarify through measurement.
- Explain through consequence.
- Contrast by analogy.
- Correlate by proportion.

* Produce oral presentations on a variety of scientific situations.

- Comment on lab experiments.
- Comment on field observations.
- Substantiate scientific hypotheses.
- Present own observations using visuals.

* Use different speech strategies for specific situations.

- Present longer commentaries.
- Make polite interruptions for expressing own observations.
- Comment on other speakers presentations.
- Participate in scientific defensive discourse.

* Converse effectively.

- Participate in social conversations.
- Participate in professional conversations.

READING OBJECTIVES

- * **Read information given through language discourse pertaining to scientific and professional material.**
 - Interpret point of view.
 - Interpret tone.

- * **Derive information from non-textual sources.**

- Interpret charts, graphs, tables, etc.
- Interpret pictures, designs, diagrams, etc.

- * **Read specialized texts efficiently.**

- Derive relevant information from journals.
- Derive relevant information from textbooks .
- Derive relevant information from other sources.

- * **Demonstrate ability to interpret texts.**

- Organize ideas in the form of tables, charts, graphs, etc.
- Rephrase parts of text.
- Critique and modify text.

WRITTEN COMMUNICATION OBJECTIVES

- * **Produce extended written forms.**

- Produce a proposed set of operations.
- Derive a set of abstract relations.
- Develop scientific description.

*** Understand and produce discourse using extended notions of science.**

- Develop cause/effect discourse.
- Explain through consequence.
- Contrast by analogy.

*** Observe the rules of good writing.**

- Write coherently, grammatically and clearly.
- Vary style and register according to topic and task.
- Select appropriate technical terminology.

*** Utilize a wide range of vocabulary and grammar.**

- Use extensive technical lexis for a variety of scientific situations.
- Use a variety of grammatical components most pertinent to scientific discourse.

THINKING SKILLS OBJECTIVES

*** Evaluate information given through extended scientific discourse.**

- Assess logical relationships.
- Determine whether a theory is warranted.
- Interpret figurative language and idiomatic expressions.

*** Transfer knowledge from one situation to another.**

- Relate textual references to real experiences.
- Apply past experience to present situations.

- * **Engage in problem-solving tasks.**
 - Identify research problems.
 - Conduct an experiment.
 - Organize and analyze results.
 - Compare findings to those reported in literature.

STUDY SKILLS OBJECTIVES

- * **Follow scholarly lectures.**
 - Reproduce information from notes taken.
 - Reproduce visuals (diagrams and graphs) from speech.
- * **Develop test-taking techniques.**
 - Work within time limits.
 - Produce clear and legible answers.
- * **Do research work.**
 - Consult reference works quickly and efficiently.
 - Develop suitable questionnaires for research purposes.
 - Construct interviews for research purposes.

CULTURAL AWARENESS OBJECTIVES

- * **Comment on cultural references in scientifically-oriented discourse.**
 - Explain various culturally-oriented attitudes.
 - Find unstated assumptions based on cultural bias.

THEMES FOR THIRD SECONDARY YEAR: GENERAL SCIENCES

THEME	EXAMPLE
* Current Issues	- Careers in the general sciences (cartographer, gem cutter, geologist, paleontologist, speleologist, volcanologist, glaciologist, meteorologist, climatologist, etc.) - Wind erosion and deposition - Galaxies - the Milky Way
* The Ecological Environment	- Interaction within the environment - Acid rain - Renewable energy resources - Inferring from fossils - Rock formation - Oil drilling - Water treatment - Solid and Hazardous wastes
* Technology	- Prospecting from the sky - Radioactive dating - Weather forecasting - Plate tectonics - The continental drift - Scientific instrument and tools (seismograph, telescope, radar, satellite, etc.)

* The Teenager	- Problems, relationships and expectations
* Democracy	- As related to other types of government
* Human Rights	- As specified by the Human Rights Charter of 1948
* Natural Phenomena	<ul style="list-style-type: none"> - Photosynthesis - Light energy - Earthquakes, volcanoes, tornadoes, storms, avalanches, tsunamis, etc. - Prehistoric life

TRANSLATION CURRICULAR OBJECTIVES

By the end of the Third Secondary, students are expected to be able to do the following:

* **Identify cultural issues and values reflected in the decoding language (DL) text and compare them with those in the encoding language (EL) culture.**

- List customs and traditions similar to or different from one's own.
- Compare varying views towards concepts of time and space.
- Compare world views of target and source language.
- Compare values and behaviors identified in the DL text with those in the EL culture.

* **Express the particularities of register and style of the DL text in the EL text produced.**

- Keep to technical terminology.
- Try to reproduce dialectal features.
- Approximate the spirit and tone of the original text.

* **Demonstrate awareness of the canons of various communicative forms of writing.**

- Use specialized terms in translating technical materials.
- Use personal expression in translating materials with expressive functions.
- Use formal standard language in rendering in EL materials with transactional nature (instruction, lectures, commentaries).
- Use rather informal language in rendering humor, anecdotes, conversations, and dialogues.

* **Compare translations of media reports and other texts with available authoritative translations.**

- Identify and examine differences in word choice, sentence structure, and word order.
- Identify and examine differences in how idiomatic expressions are rendered.
- Give plausible explanations to differences and revise accordingly.

***Demonstrate flexibility and command of various modes of translation.**

- Use exact equivalences whenever possible.
- Use substitutes or non-exact equivalents that are nearest to meaning.
- Retain original words in transliterated form and provide explanation when no equivalents are found.
- Apply interpretative and descriptive translation when DL or EL text is highly figurative.
- Use non-idiomatic plain prose translation to convert an idiomatic expression.
- Shorten ideas when details are superfluous.
- Omit parts of text only in case of tedious/needless repetition.

*** Demonstrate ability to work in pairs or in groups on a translation task.**

- Compare various translations.
 - Identify similarities.
 - Discuss differences.
 - Listen and respond to appropriate suggestions.
 - Reach an agreement.
 - Produce collaborative translations.

*** Demonstrate ability to get meaning from different kinds of dictionaries (mono-lingual, bilingual and thesaurus) and other references.**

- Identify denotative and connotative meanings of words in DL and EL.
- Select the meaning that fits the specific text at hand.
- Use the words in the text in additional meaningful sentences.
- Search for equivalent dictionary meanings.

THEMATIC UNITS

Topics accessed in translation texts should be drawn from many subject areas. Particular emphasis should be placed on themes relevant to the learners' subject areas and future academic studies. The material of the text should be clear, comprehensible and easy to read. This is essential because only clear language can be accurately converted. Moreover, the text should be consistent and coherent , in the sense that implicit and explicit causal relations should be detectable.

In the process of text selection, an eye should be kept on the linguistic function which the text might serve, i.e. the material accessed should be directly relevant tot the study of Arabic and English. Although students in the second and third secondary should be exposed to all the themes listed, it is recommended that in each class, special emphasis be placed on the themes that appear under that class.

A METHODOLOGICAL OVERVIEW OF THE NEW ENGLISH CURRICULUM

The new English curriculum has been developed around the principle of integrating language and content in the English as a foreign language classroom. It calls for organizing instruction around meaningful and developmentally appropriate themes. A basic premise here is that integrating language and content is effective in improving the linguistic and content area gains; in enhancing academic, linguistic, and cognitive development (Cummins, 1981); and in providing comprehensible input (Krashen, 1982). This is because thematic-based instruction enables learners to develop denser background knowledge, to read and write from multiple perspectives, and to engage in meaningful and interactive tasks in a print-rich environment. Materials representative of all spoken and written genres will be chosen from a variety of sources and academic disciplines keeping in mind the need for having authentic, interesting, relevant, and exploitable content.

METHODOLOGY

The curriculum aims at developing three levels of English language proficiency: a) English for social interaction, b) English for academic purposes, and c) English for socio-cultural development. These levels are largely determined by a number of critical input, output, and context variables such as comprehensibility, redundancy, frequency, accuracy, and motivation. We believe that the most appropriate framework of classroom interaction that will address the above conditions and achieve the desired levels of proficiency is Cooperative Learning (CL). Essentially, CL constitutes a series of pro-social methods and structures (such as think-pair-share, mixer review, information gap, jigsaw, group investigation, and round table) which involve students working together according to the

principles of simultaneous interaction, positive interdependence, individual accountability, and team reward. A detailed description of the dynamics and procedures of CL can be found in Kagan (1992) and Slavin (1990).

At the lower levels of proficiency, there is emphasis in the new curriculum on the role of contextualized and motivating language practice in developing all the skill modalities. Consequently, the comprehension-based and humanistic-affective methodologies such as the Total Physical Response (TPR), Silent Way (SW), Whole Language, Natural Approach, Suggestopedia, Community Language Learning (CLL), and skill integration approaches are employed. Along similar lines, a wide variety of hands-on, acting-out, and task-based activities as well as language experience stories, dialogue journals, learning logs, and graphic organizers are also used, depending upon the curricular objectives and/or themes under consideration. For a detailed description of these methodologies and activities see Freeman (1986), Nunan (1991), Weaver et al. (1990), and Shaaban et al. (in press).

At the intermediate and advanced levels of proficiency, the emphasis gradually shifts from pre-academic to academic and socio-cultural English as learners develop their critical thinking skills and acquire a wide variety of linguistic and grammatical structures needed for immediate success in an all-English curriculum in various areas of study and at the university level.

SKILLS

The stages of instruction and modes of presentation in developing the skills of listening, oral fluency, reading, and written communication are based on the pedagogical implications of some widely accepted theoretical views (models) of the skills and in accordance with optimal conditions for language acquisition.

Listening

Viewed as an active communication process, listening involves the transform of auditory input into intelligible and useful comprehension. Thus, the new curriculum provides learners at the beginning levels with opportunities to develop their sub-skills of auditory discrimination, auditory analysis, and memory as well as attention, code selection and schema search and instantiation. At the advanced levels, listening tasks emphasize academic listening activities which include note-taking, organization, interpretation, and evaluation. Instruction is planned according to the proficiency levels of learners and gradually moves from deriving direct meaning to making inferences, to deriving critical meaning drawing on a variety of authentic materials such as recordings, radio broadcasts, songs, TV shows, lectures, and so forth. Similarly, the stages of lesson planning proceed from pre-listening to listening, to post listening activities in order to help learners build and/or activate relevant background, comprehend what is heard and finally interpret and reflect on their comprehension. The following activities listed under each stage are examples of what may be done in a listening comprehension class.

Pre-Listening Stage

- Giving background information
- Reading relevant material
- Looking at related pictures and illustrations
- Discussing statements
- Answering questions relevant to text
- Labeling a picture

Listening Stage

- Marking/ checking items in pictures
- Identifying the relevant picture
- Organizing pictures in order
- Completing pictures
- Drawing pictures
- Tracing/ following a route on a map
- Carrying out activities
- Completing grids/ forms/ charts
- Answering questions raised in the pre-listening stage
- Spotting mistakes

Post-Listening Stage

- Solving problems
- Interpreting text
- Role-playing
- Extending lists
- Sequencing/ grading
- Matching
- Summarizing

- Jigsaw listening
- Identifying relationships between speakers
- Recognizing mood/ attitude/ bias/ intention

Oral Fluency

Oral fluency instruction aims at engaging learners in meaningful, referential, and exploratory talk as they express their needs, feelings, ideas, and intellectual positions in a relaxed and supportive environment. Instruction is organized according to the proficiency levels of learners as they gradually develop their skills of using formulaic expressions, information routines (describing, making comparisons, telling stories, and giving instructions), and transactional routines (such as telephone conversations, interviews, meetings, and discussions) to negotiate and construct meaning. The stages of instruction proceed from pre-speaking to speaking and post-speaking in order to describe objects in the immediate environment, fill in information gaps, debate controversial issues, and convey intellectual positions, observing the systematics of turn-taking and culturally appropriate behavior. The following activities listed under each stage are examples of what could be done in an oral communication class.

Pre-Speaking Stage

- Examining pictures
- Listening activities related to topic
- Reading a relevant text
- Collecting information from a variety of sources

Speaking Stage

- Responding appropriately to prompts
- Participating in dialogues
- Presenting new material
- Commenting on a topic
- Reciting poetry
- Leading/ participating in discussion
- Observing systematics of turn-taking
- Participating in problem-solving activities
- Conducting interviews

Post-Speaking Stage

- Role-playing
- Writing a summary
- Using graphic organizers to represent ideas
- Evaluating the speaking activity
- Conducting further research
- Making a detailed presentation
- Participating in project work

Reading

Reading is perceived in the curriculum as an active process of constructing meaning as a result of the interaction between the reader and the text, that is the interaction between textual input (content and form) and existing background knowledge (experience and prior knowledge). As such, learners are trained in a variety of text-processing and background activation and/or building strategies according to three stages of lesson planning i.e., pre-reading, reading, and post-reading. As students go through these stages, they develop the requisite background knowledge for comprehension, set expectations for reading, confirm their expectations, and finally critique and evaluate their comprehension of what is read. The following activities listed under each stage are examples of what could be done in a reading comprehension class.

Pre-Reading Stage

- Brainstorming about a topic
- Drawing semantic webs and/ or charts
- Defining key words and expressions
- Watching a film related to topic
- Doing a know-wonder-learn activity
- Becoming familiar with structures, genre, and style
- Scanning graphics, headings, and titles
- Making predictions based on knowledge of topics or on textual clues
- Answering questions on text

Reading

- Revisiting and revising predictions
- Relating to previous knowledge
- Reconsidering answers to pre-reading questions
- Comprehending what is being read
- Maintaining interest
- Formulating and testing hypotheses
- Identifying what is positive interesting and neutral (P.I.N.)

Post-Reading

- Using graphic organizers to represent ideas
- Elaborating, expanding, and extending
- Transferring acquired information and skills to new contexts
- Answer comprehension exercises
- Writing an essay on a related topic

Written Communication

The new curriculum proclaims a process-oriented view of composing which involves having students go through the following stages: pre-writing, writing, revising, and publishing. Instruction is organized to help learners manage their acts of composing, develop their authentic voice as writers, and self-sponsor their written products. During pre-drafting, learners explore and

conceptualize their topics through a variety of heuristic procedures following which they write multiple drafts of their ideas and finally revise and share their written products with the rest of the class through bulletin boards or the school magazine. Furthermore, at the advanced levels of proficiency learners develop their skills of academic writing in a variety of assignment formats such as reports and research papers according to the expectations of an academic audience in the various fields of study. The following activities listed under each stage are examples of what could be done in a written communication class.

Pre-Writing

- Gathering information and thoughts
- Brainstorming about the topic with peers
- Narrowing the topic
- Outlining
- Reading texts related to the topic
- Watching a movie or a documentary related to the topic
- Identifying audience, purpose, and genre
- Developing and writing a plan
- Asking probing questions

Writing

- Writing the first draft
- Stressing clarity over mechanics
- Maintaining stream of consciousness
- Requesting the help of the teacher when experiencing mental block

Revising

- Checking for purpose, audience, and clarity
- Checking for register
- Taking into consideration input from teacher and peers
- Correcting spelling, syntax, and mechanics

Publishing

- Ensuring legible handwriting
- Using illustrations and pictures as needed
- Sharing final version with others
- Receiving a grade

Beside emphasis on the four language skills, the new curriculum promotes critical thinking, study skills, and cultural awareness. Of particular importance in this regard is helping learners assess their own use of language and develop their awareness of the linguistic and organization features of a wide variety of oral and written text-types. Similarly, the new curriculum underscores the importance of learning strategies and effective study habits as well as curiosity and empathy toward other cultures.

In brief, the English curriculum provides for the development of learning and thinking strategies which help students extend their communicative competence, construct and use their academic knowledge effectively, and expand their socio-linguistic and socio-cultural horizons in a stress-reduced learning environment.

INSTRUCTIONAL MATERIALS AND ACTIVITIES

One of the main arguments for the adoption of a content-based approach to the teaching of English as a foreign language is that in this approach students are given instructional materials which are either at or just above their language proficiency level. Furthermore, because of the familiarity of the content of the materials used for instruction, the anxiety and tension generated normally when students face an unfamiliar text are substantially reduced. Consequently, students acquire language proficiency while they continue to develop cognitively and to reinforce their knowledge of content by further exposure to the content presented in new forms.

The instructional materials selected and/or adapted for the thematic units encompassed a wide variety of text types and teaching aids. Of particular concern to us was the development of theme-based packages of instructional materials that are authentic, exploitable, and relevant to the theme under study. Therefore, we selected materials which, though not generated specifically for any language teaching purposes, included a good range of language functions and structures as well as reflected up-to-date and developmentally appropriate and interesting content. For example, to cover the theme of "Human Communication" in grade 10, we used materials selected from the content areas of literature, psychology, and sociology. Selected materials were first photocopied,

typed, and then sequenced and matched with instructional objectives. Materials which deviated from “good” writing were adapted by changing words, deleting extraneous text features such as unnecessary remarks, and adding connectors. We were careful to keep these modifications minimal in order not to fall into oversimplification whereby the text loses its authenticity, which contradicts the basic principles of theme-based language instruction.

In order to help learners process challenging and difficult texts, we resorted to the use of learning “crutches” such as audio-visual aids, grids, graphic organizers, and the like which we will discuss later. Some of the instructional aids which we recommend that teachers draw on in their teaching are: charts, tables, diagrams, illustrations, pictures, realia, transparencies, tape-recordings, radio and television programs, films, interactive videos, and specially-designed videos. The tools that we believe every EFL teacher should have access to, in addition to classroom walls and chalkboard, are video cassettes, overhead projectors, tape recorders, radios, televisions, and advanced computers.

As for classroom activities, students will be involved in hands-on performance tasks, brainstorming in groups, physical involvement, discussions, developing semantic maps, and the like. Special emphasis is placed on the use of graphic organizers such as graphs, tables, maps, flow charts, and Venn diagrams because they are used to place information in meaningful contexts and, consequently, help students develop learning strategies, increase retention, activate background knowledge and prior learning, and organize ideas logically. The ultimate goal of using these aids and activities is to facilitate communication and comprehension as a result of the development of the following elements associated with language development in a theme-based approach:
Amplification: This is achieved by means of reducing linguistic barriers through familiarizing students with unfamiliar structures, vocabulary, and concepts (Addison, 1988).
Contextualization: This is achieved by means of providing learners with realia, visuals, and props (Cummins, 1981).

Negotiation of meaning: This is achieved by means of developing the strategies of confirmation, elaboration, expansion, and extension through activities such as brainstorming, pairwork, and discussions (Pica, Young, & Doughty, 1987).

Redundancy: This is achieved by means of recycling knowledge, accessing background information, restating and paraphrasing, and reaching the same information through various sources (Savill-Troike, 1991).

Cognitive Work: This is achieved by means of getting enough practice in outlining, summarizing, highlighting and underlining texts, writing down key words, and generating questions (Webb, 1988).

EVALUATION GUIDELINES

In developing the evaluation component for the new English curriculum, we adopted the context-adaptive model for developing language achievement tests (Turner, 1992). This model fits the principles and characteristics of theme-based language instruction as it divides the process of test writing into stages during which teachers clarify instructional objectives, determine and describe appropriate test formats, and establish the clarity, practicality, reliability, and validity of those formats.

Evaluation is viewed in the curriculum as an integral part of the learning/teaching process in the sense that the achievement tests are meant to reflect both curriculum objectives and classroom activities. Furthermore, evaluation is treated as a continuous operation that employs various formal and informal tools of assessment for obtaining information about a student's proficiency level. Continuous evaluation will thus incorporate the latest trends in testing and assessment such as oral and written tests, group tests, peer evaluation, self evaluation, portfolios, observations, interviews, and conferences. Finally, the tests will reflect the questioning and answering schemes and strategies that the new curriculum has recommended for use in the classroom; this view fits rather well within the current practices in testing which support the principle that "in constructing tests it is important to include texts and activities which mirror as closely as possible those which students have been exposed to and/or are likely to meet in their future target

situations" (Weir, C., 1993: 65). Questioning routines such as cloze procedure, wait-time (for oral work), wonder questions, think - pair - share (TPS), and positive - interesting - neutral (PIN) as well as questioning frameworks such as description, personal interpretation, and critical and creative questions will be reflected in the designed tests. Answering frameworks, or possible student answers, need also to be considered; Olsen (1996) provides the following useful adaptation of Krashen and Terrell's taxonomy of the stages of language acquisition and response task types:

Taxonomy and Student Response Task Types

Stage of Acquisition	Performance Indicator(s)	Student Response(s) / Ask Students to:
<i>Stage One:</i> Preproduction	Kinesthetic	point watch number circle follow directions
<i>Stage Two:</i> Early Speech	Kinesthetic; AND one- or two-word utterances	act out choose arrange or sort out visuals manipulate gesture mark use label number tell use group or sort words or phrases manipulate answer categorize
<i>Stage Three:</i> Speech Emergence	Kinesthetic; one or two words utterances; AND phrases and	describe explain retell recall summarize

simple sentences

compare contrast write
follow directions read
give or list steps

Stage Four:

Fluency Emergence

Kinesesthetic; words, phrases,
and simple sentences

justify create give opinion
debate defend analyze
describe in detail examine

Another model that was consulted in connection with teaching and testing English as a foreign language is the 3R's model (Olsen, 1996). The model discusses three ways in which students interact with content materials; these ways reflect different types of mental activity. The three R's are: recognition, replication, and reorganization. Recognition corresponds to Krashen and Terrell's silent period and early speech and involves performance tasks such as matching, choosing, and manipulating objects. Replication corresponds to Krashen and Terrell's early speech through fluency emergence and involves tasks such as exchanging information in charts, maps or picture pairs. Reorganization requires students to demonstrate the ability to reorganize given information into different formats or text types; it includes performance tasks and activities that lend themselves to group work such as creating a time line, an outline, or a semantic map. Reorganization tasks are very practical in that they "can accommodate various levels of language proficiency from 'silent' and 'speech emergence' through 'fluent' stages of Terrell's taxonomy as well as articulate, highly verbal responses" (Olsen, 1996: 16).

With all the of the above considerations as guidelines for the teacher-tester, the task of designing tests of students' achievement becomes relatively clear and manageable. However, before deciding on the test format, the teacher needs to become aware of the test operations, that is he has to determine what it is that he wishes to measure and/or what he believes the students can

do; he also needs to become aware of the test conditions, that is under what circumstances (Weir, 1993). Conditions and operations differ slightly between the skills involving comprehension (listening and reading) and those involving communication (speaking and writing). For example, the following considerations fall under the heading of operations for comprehension skills: direct meaning (main ideas and details, and attitudes), inferred meaning (situation, writer/speaker, and discourse function) and linguistic and organizational features of the text; on the other hand operational considerations for communication skills include: informational skills (narration, description, definition, instruction, comparison, explanation, and presentation), interactional skills (expressing, eliciting and responding, directing, and decision-making), and improvisational skills (negotiation of meaning, argumentation, and management of interaction). Examples of conditions considerations for comprehension skills are the following: purpose, nature of text, organization, lexical range, topic, status of writer/speaker, schemata, size of input, and textual complexity; on the other hand, conditions considerations for communication skills include: purpose, text type/discourse output required, functioning under normal time constraints, interlocutors/audience, organization, lexical range, type of information, cognitive demands, setting, channel, and size of output. Needless to say, there are special features of each skills that the test designer needs to observe.

As for the actual design of the test, we suggested that teachers identify testing objectives by examining the objectives and performance tasks set in the curriculum and targeted in the various instructional units. Teachers may then determine the test formats in light of the nature of those objectives and performance tasks, following which they may write test specifications in order to guide the process of test writing through specifying the purpose, source, and scoring procedure of the test. For example, teachers may use the formats of labeling, matching, and/or cloze type exercises to assess vocabulary acquisition and, then, score such tests objectively based on an answer key. Similarly, teachers may use essay type questions and score responses holistically in order to measure content knowledge and writing proficiency. Other test formats may include ratings of learners' responses according to some established criteria in order to measure analytical skills; they may also include using observation forms in order to assess learners' level of

participation and engagement in class activities such as journal writing, free writing, questioning, role playing, and so forth.

Upon specifying test formats and test specifications, teachers may set acceptable standards for achieving the instructional objectives under consideration. These standards may take the form of numerical scores of accurate answers (80 % or 85 %) or letter grades (A, B, or C) whereby non-numerical assessment may be translated into numbers and/or letters. As it may be difficult to ask teachers to pilot achievement tests, it is recommended that tests be prepared and reviewed by a group of teachers in order to establish test validity. Needless to say, scoring tests should also be the work of a group as well in order to establish inter-rater reliability and uniformity.
